- Perfect for small businesses and DIY applications

Traditional Rubber Stamp + Deep Mould

Our traditional rubber stamps have photopolymer dies, perfect for marking on porous surfaces like paper, but if you're going to be stamping thicker porous surfaces (like corrugated cardboard) or for large stamps with a lot of detail, then the deeper mould ensures a quality impression on a larger variety of surfaces.

Natural Rubber

Recommended when stamping non porous surfaces that require fast-drying inks such as catalogues, photographs, metal, and varnished wood. Our natural rubber stamps will not swell when using fast dry ink, allowing a good impression every time you stamp.

Natural Rubber + Deep Mould

Natural Rubber Stamps with Deep Mould are recommended for oversize stamps with detailed logos, multiple lines in a thin font style, and stamp images containing large areas with no graphics to ensure all details and text are legible ensuring a quality stamp impression.

Rocker Mount

For uneven surfaces or areas with mild recess, a deep mould with a rocker mount is recommended. Best for wood and corrugated cardboard. Price includes mount and stamp.
